RECOMMENDATIONS

Name: Suleimenova Aisulu Arystanovna | Computer Science teacher

I am honored to recommend Aligaziyeva Sabina, an exceptional 12th-grade student. Sabina stands out for her ability to delve deeply into complex topics and turn her knowledge into practical solutions. Whether preparing presentations or leading projects, she consistently demonstrates intellectual depth and a proactive approach. Her leadership skills are equally impressive. She successfully led initiatives to improve her community, such as proposing and implementing a compost bin for recycling organic waste, a project embraced by her school. One of her most notable achievements was creating a hologram of a historic building using 3D modeling, an ambitious project that won first place in a national competition. This accomplishment showcased her technical expertise, creativity, and respect for cultural heritage. Beyond academics, Sabina is a compassionate individual who helps peers develop skills with patience and enthusiasm. Her kindness and collaborative spirit make her a valued member of any team.

Sabina's intelligence, creativity, and empathy ensure she will excel in any endeavor. It has been a privilege to witness her growth, and I am confident in her bright future.
